Opis

Ocean Next™ software

If you want a swift, easy-to-use application for routine controls, or a customized application with workflow, automatic tests, and traceability, the new Ocean Next™ software provides you with both options.

Plan your measurements in advance, create checklists, add information as a pop-up window, and include instructions to simplify the work for you and your co-workers using a streamlined user interface.

The software is compliant with all our Piranha and Cobia meters as well as the new RTI Scatter Probe.

The new power in X-ray QA software

The importance of dedicated software applications to conduct professional QA is growing.

Microsoft Excel is flexible but not enough to meet the growing demands for traceability, compliance, and efficiency.

By using Ocean Next™, you can plan the measurements in advance, create checklists, add information as a pop-up window for a specific exposure, and include instructions to simplify the work for you and your co-workers using a streamlined user interface.

Choose from three different license levels: Quick, Advantage, and Professional.

Quick: for swift QA

Start measuring within seconds. The application detects what instrument and probes you have connected to assist you the best way possible – just “Plug n Play”.

The interface adapts, and all the measured parameters are displayed on one screen.

The results and waveforms can be retained in the database for later review and compiled in a report.

Advantage: for streamlined QA measurements

For more advanced QA measurements than Quick, the Advantage license enables customization of templates to suit your needs. Predefined workflows, automation of steps, and graphs.

In Studio View, you can design single-page templates (including analysis and checklists) and important reports, e.g. with your own logo and layout.

Professional: complete QA system for superior efficiency and compliance

For trend analysis and full traceability of your measurements. You can build a holistic solution for your X-ray QA, by storing your measurements in a searchable database structured to your needs.

The archived measurements are available for quick and intuitive retrieval.

Versions of this product:

Ocean Next™ – Professional

Complete QA system for superior efficiency and compliance. For trend analysis and full traceability of your measurements. Apart from the features of Ocean Next™ – Advantage, the Professional level also allows you to build a holistic solution for your X-ray QA, by storing your measurements in a searchable database structured to your needs. The archived measurements are available for quick and intuitive retrieval. Note: This article is used when purchasing Ocean Next™ together with a Product.

Ocean Next™ – Professional (Stand-alone)

Complete QA system for superior efficiency and compliance. For trend analysis and full traceability of your measurements. Apart from the features of Ocean Next™ – Advantage, the Professional level also allows you to build a holistic solution for your X-ray QA, by storing your measurements in a searchable database structured to your needs. The archived measurements are available for quick and intuitive retrieval. Note: This article is used when purchasing Ocean Next™ together with a Product. Use this article when ordering Ocean Next™ to existing instruments. Included: USB Stick, license key, and User's Manual.
